

Intermediate Tax-Free Laddered Fixed Income

Quarterly Fact Sheet

As of December 31, 2025

Objective

The objective of Cavanal Hill's Intermediate Tax-Free Laddered Strategy is to generate current income that is exempt from federal income taxes by investing at least 80% in a diversified portfolio of investment grade (or deemed investment grade) municipal securities at the time of purchase.

Process

Cavanal Hill's investment process for this portfolio includes macroeconomic assessment, market research, security analysis, and ongoing monitoring of tax-free investment-grade bonds.

Portfolio Construction

Cavanal Hill believes that municipal securities offer the potential for attractive yields and enhanced safety of principal. This strategy will follow a typical laddered approach while also allowing flexibility to adjust for the credit and rate environment, as well as specific security selection opportunities. The laddered maturity range target is 1 to 10 years (with a target maximum of 20% in any one given year).

Portfolio Characteristics

Cavanal Hill Intermediate Tax Free Laddered Fixed Income (creation 11/01/2018, inception 1/1/2019)

Includes all portfolios invested in at least 80% municipal securities with a laddered maturity structure. The laddered maturity range target is 1 to 10 years (with a target maximum of 20% in any one given year). The benchmark is the Bloomberg Managed Money Short/Intermediate (1-10) Index. Accounts will enter this composite as of the beginning of the second full month of performance. Beginning April 1, 2020, all accounts with cumulative in-kind or cash transfers into the portfolio of more than 25% of beginning assets or with cumulative in-kind or cash withdrawals in excess of 25% of beginning assets will be excluded from the composite for the month of the contributions or withdrawals and for one full month after the contributions or withdrawals.

* Periods less than one year are not annualized. Net of fee returns are modeled by reducing gross monthly returns by 1/12th of the highest annual management fee in our fee schedule.

1 To be included in the Bloomberg Managed Money Short/Intermediate (1-10) Index, bonds must be rated Aa3/AA- or higher by at least two of the following ratings agencies: Moody's, S&P, Fitch. If only two of the three agencies rate the security, the lower rating is used to determine index eligibility. If only one of the three agencies rates a security, the rating must be at least Aa3/AA-. They must have an outstanding par value of at least \$7 million and be issued as part of a transaction of at least \$75 million. The bonds must be fixed rate, have been issued within the last five years, and must be at least one year from their maturity date. AMT, hospital, housing, tobacco, and airline bonds, along with remarketed issues, taxable municipal bonds, floaters, and derivatives, are excluded from the benchmark.

2 Maturity Distribution is calculated using a one year maturity or less for Variable Rate Demand Notes and final maturity date for all other municipal securities.

SEC Disclosure

Gross performance results do not reflect the deduction of investment management fees other than trading costs. Gross performance data includes the reinvestment of interest, dividends, and other earnings. The value of investments may rise or fall. **Past performance does not guarantee future results.** Investments are subject to risks, including the possible loss of the principal amount invested. Client returns will be reduced by management fees and any other expenses incurred in the management of an account. Net performance results reflect the deduction of investment management fees and trading expenses, but do not reflect the effect of other fees which may be incurred, nor do they reflect compounding which may further reduce the returns shown. Cavanal Hill's investment advisory fees are described in Part 2A of its Form ADV.
