

Short-Intermediate Government Fixed Income

Quarterly Fact Sheet

As of December 31, 2025

Objective

Cavanal Hill's Fixed Income Strategies are rooted in the belief that inefficiencies do exist in the marketplace and, through active management, we can provide value to our clients by taking advantage of these opportunities. We believe that excess return is good, but risk-adjusted excess return is even better. The pursuit of superior returns must be tempered with strong risk management processes.

Process

Cavanal Hill's fixed income management process is fundamentally driven, disciplined, diversified, and value-oriented. Our process targets four distinct variables, which include duration management, yield curve positioning, sector allocation, and security selection. We seek to reduce volatility through allocation of risk across all of these variables.

Portfolio Construction

Portfolios are constructed with government securities, including Treasuries, agencies, and agency MBS. Primary consideration is given to numerous and diverse value-adding opportunities using duration management, yield-curve positioning, sector allocation, and security selection. We can and do make major shifts in our sector allocations to take advantage of short-term market conditions. Duration is closely managed to +/- 25% of the benchmark duration. We believe this allows us to take advantage of opportunities while managing volatility.

Portfolio Characteristics

Cavanal Hill Short-Intermediate Government Fixed Income Composite (creation 3/31/2006, inception 10/1/2003)

Includes all portfolios invested in fixed income securities with a mandate of all government and agency backed securities. Accounts may take temporary defensive positions in response to adverse market, economic, political, or other conditions which would not be consistent with the stated average duration range. Portfolios within the composite will have a duration that is +/- 25% of the benchmark. The benchmark is the Bloomberg U.S. Intermediate Government Bond Index. The composite definition changed on 3/16/18 to a focus on duration from a focus on an average maturity between 3 and 7 years.

* Periods less than one year are not annualized. Net of fee returns are modeled by reducing gross monthly returns by 1/12th of the highest annual management fee in our fee schedule.

1 The Bloomberg U.S. Intermediate Government Bond Index covers the USD-denominated, fixed-rate, SEC-registered Treasury and Government-Related securities with maturities between one and ten years. The index is unmanaged. Investors cannot invest directly in an index. The above index does not reflect the fees associated with a managed account.

SEC Disclosure

Gross performance results do not reflect the deduction of investment management fees other than trading costs. Gross performance data includes the reinvestment of interest, dividends, and other earnings. The value of investments may rise or fall. **Past performance does not guarantee future results.** Investments are subject to risks, including the possible loss of the principal amount invested. Client returns will be reduced by management fees and any other expenses incurred in the management of an account. Net performance results reflect the deduction of investment management fees and trading expenses, but do not reflect the effect of other fees which may be incurred, nor do they reflect compounding which may further reduce the returns shown. Cavanal Hill's investment advisory fees are described in Part 2A of its Form ADV.
